; GENERAL INFORMATION:
APPLICANT: Hubbell, Earl A.
APPLICANT: Morris, Macdonald S.
APPLICANT: Winkler, James L.
TITLE OF INVENTION: Computer-Aided Engineering System
TITLE OF INVENTION: for Design of Sequence Arrays and Lithographic Masks
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1.5%; Score 12.2; DB 1; Length 17; 58.8%; Pred. No. 4.6e+02;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       3; Indels

Sequence 29, Application US/08998099A

Patent No. 610398

GENERAL INFORMATION:
APPLICANT: MCSWIGGEN, JAMES A.
APPLICANT: MCSWIGGEN, JAMES A.
APPLICANT: STITCHCOMB, DAN T.
TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT OF DISEASES
FILE REFERENCE: 231/176

FILE OF INVENTION: OR CONDITIONS RELATED TO LEVELS OF C-FOS
                                                           RESULT 466.

Sequence 2.3 Application US/08540448

Patent No. 5786145

GENERAL INFORMATION:

APPLICANT: KARN, JONATHAN

APPLICANT: GAIT, MICHAEL J.

APPLICANT: BAPHY, SHAUN

APPLICANT: DINGWALL, COLLIN

TITLE OF INVENTION: VIRAL GROWTH INHIBITION

NUMBER OF SEQUENCES: 25

CORRESPONDENCE ADDRESS:

ADDRESSEE: P.C.

STREET: 1755 S. Jefferson Davis Highway, Suite 400

CITY: Arlington

STREET: 1755 S. Jefferson Davis Highway, Suite 400

CITY: Arlington

STREET: US-A.

ZIP: 22202

COUNTRY: US-A.

ZIP: 22202

COMPUTER REABALE FORM:

MEDIUM TYPE: Floppy disk

COMPUTER: IBM PC compatible

COMPUTER: IBM PC compatible

COMPUTER: BAPAILE FORM:

MEDIUM TYPE: PLOSPY MS-DOS/MS-DOS

SOFTWARE: BAPENTIN Release #1.0, Version #1.25

Patent No. 6040140

GENERAL INFORMATION:
APPLICANT: Croce, Carlo
TITLE OF INVENTION: Diagnostics, Therapeutics and Methods
TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias
TITLE OF INVENTION: Resulting from Chromosome Abnormalities in the All-1 Region
NUMBER OF SEQUENCES: 94
CORRESPONDENCE ADDRESS:
ADDRESSEE: Woodcock, Washburn, Kurtz, Mackiewitz &
ADDRESSEE: No. 6040140ris
STREET: One Liberty Place, 46th floor
CITY: Philadelphia
STATE: Pennsylvania

Sequence 4727, Application US/09422978

Sequence 4727, Application US/09422978

Patent No. 653751

APPLICANT: Cohen, Daniel

APPLICANT: Chen, Daniel

APPLICANT: Chunakov, 11ya

TITLE OF INVENTION: Biallelic markers for use in constructing a high density...

FILE REFERENCE: GENERAL 1999-10-20

CURRENT APPLICATION NUMBER: US/09/422, 978

CURRENT FILING DATE: 1999-04-21

EARLIER FILING DATE: 1999-04-21

EARLIER FILING DATE: 1999-04-21

EARLIER FILING DATE: 1999-04-21

NUMBER OF SEQ ID NOS: 11796

Sequence 61, Application US/08261822A

Patent No. 5650553

Patent No. 5650553

GENERAL INFORMATION:
APPLICANT: Ecker, Joseph R. et al.
TITLE OF INVENTION:
TITLE OF INVENTION:
NUMBER OF SEQUENCES: 82
CORRESCONDENCE ADDRESS:
ADDRESSES: Woodcock, Washburn, Kurtz, Mackiewicz & No. 5650553ris
STREET: One Liberty Place, 46th floor
CITY: Philadelphia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
